SUMMARY

- I am a full stack web developer enjoying what I am doing and a learning addict.
- I started learning web development in 2016 by learning front-end.
- And I fell in love with it so I could not stop myself from studying back end too.
- Now I am a full stack web developer using JAVASCRIPT in almost all of my works.
- Recently I write some articles about web development on [my blog](#).

EDUCATION

Specific Education College **Education Technology Department** **EI-Fayoum University**

2016–2020: While studying at college I was aiming to be the first in my department and beside this goal I was hoping to be a web developer, So I was studying web development (self-study) beside the academic study.

July 2020: I graduated and I earned the **FRIST** place in my department and the **SECOND** place in my college with **GPA** : 3.675. And I got an **A+** in my graduation project.

SKILLS

Fluent: Html, Css, JavaScript, Vue.js, Vuex, Ajax.

Intermediate: Jquery, Nuxt, Bootstrap, Sass, Pug, Ejs, Node.js/Express, MongoDB/Mongoose, Canvas, SVG, Git/Github, Three.js, P5.js, Socket.io.

Familiar with: React, Php, Mysql, C++, Visual Basic, NativeScript, Electron.

In process: GraphQL.

STUDENT ACTIVITIES

TECHNO EGABY: I made it with my friend when I was in college for initiative called “Techno Egaby” to raise the awareness against corona viruse. (*php, mysql, bootstrap, js, ajax*).

Code: <https://github.com/ahmadfathy97/Techno-Egaby>

PROJECTS

- **ICC:** My graduation project that helps people to know the inner components of the computer by giving them interactive 3D objects attached to some information about the components. (*three.js, electron, html, css*).
Code: <https://github.com/ahmadfathy97/jcc>
- **Habshtakanat:** Is a blog website you can Share your experiences with your followers and get some feedback about it, And learn new things in different fields from the people you are following. (*Express, Mongodb, Vue.js, ajax, Bootstrap*).
API code: <https://github.com/ahmadfathy97/api>
Front End Code: <https://github.com/ahmadfathy97/using-my-api-with-vue>
- **Genuine:** This project is an Ecommerce website. (*Express, Mongodb, Ejs, Bootstrap, Paypal-SDK*).
- **10-js-projects:** I love to challenge myself so I decided to make 10 projects with different technologies as I could. (*Chartjs, Electron, Threejs, Vue.js, Express, Mongodb, Socket.io, NativeScript, Face-API, P5.js*).
- **Arabic2franko:** This project is a package that converts arabic to franko.
Code: <https://github.com/ahmadfathy97/arabic2franko>

WORK EXPERIENCE

JUN 2020 – MAY 2021: Full stack developer – Freelancer.

- I built front end projects like ‘[براييل بالمصري](#)’, full stack projects like ‘MI FINANCE’ and I built some APIs and fixed some issues in different websites.
- I was flexible to choose the technologies that suits the projects the most.

MAY 2021 – AUG 2021: Front end developer at SSD company.

- Using vue.js framework and some plugins I helped build care website and its dashboard.
- helped my co-workers to develop their skills in vue.js.
